**INCREASE YIELDS!
CUT COST!**

Now—yeast nutrients priced for commercial production

If your fermentation operation could benefit from a low-cost yeast nutrient, or if you have a process that needs a low-cost yeast nutrient to go into production, it will pay you to evaluate Vico's yeast autolysates.

Vico's new line of six low-cost yeast extracts for the Fermentation Industries are produced by autolysis (enzymatic hydrolysis) of Brewers' yeast and are under careful laboratory control to insure constant uniformity. Although Vico's yeast autolysates are low-priced, they perform

like high-priced autolysates and extracts used by the bacteriologist.

Yeast autolysates are sold in bulk in the form of free-flowing powders or concentrated pastes. Both the powders and pastes are stable and can be stored indefinitely without refrigeration.

We will appreciate the opportunity to develop yeast nutrients to suit your special needs. Of course your inquiry puts you under no obligation. We'd like to hear from you.

Samples; chemical, vitamin, amino acid and ash analyses; price list and examples of application of yeast extracts in industrial fermentations are available upon request.

Vico Products Company, 415 W. Scott Street, Dept. JB
Chicago 10, Illinois. Phone: MIchigan 2-7731

Manufacturing chemists to the food, pharmaceutical and fermentation industries.

GYROTORY[®] TIER SHAKER

Model
G 52

Powerful, Large Capacity Rotary Shaker Precision Built For Continuous Duty

This double tier shaker accommodates large numbers of various size flasks on 6 removable trays. Trays lock into a sturdy steel shaking frame which is uniformly rotated in a 2" eccentric circle. A continuously adjustable speed range of 150 to 350 rpm is achieved mechanically without variation. Heavy duty, 5-eccentric-shaft stabilizing system assures smooth, positive, reproducible agitation.

This powerful laboratory workhorse can handle extremely heavy loads under continuous, day and night operation. Other models with 1, 3, and 4 tiers, for bottles, jugs and other containers. Also available with reciprocating motion.

OVERALL DIMENSIONS: 40" long x 51" wide x 35" high

manufacturers of bird and animal diets.

Waksman: NEOMYCIN

"Accumulated information necessitated the preparation of a new and more comprehensive volume on neomycin. The present volume is a result of the cooperative effort of a large number of investigators and clinicians from many different laboratories. An attempt has been made to present in this volume a comprehensive summary of the nature and utilization of neomycin, accompanied by as complete a bibliography of the literature pertaining to neomycin as could be assembled."—From the preface

to determine ASTO* in streptococcal infections...

SIMPLY...RAPIDLY...RELIABLY

STREPTOLYSIN O REAGENTS, Cappel

*As an aid in the differential diagnosis of rheumatic fever, physicians are increasingly requesting antistreptolysin O determinations (ASTO) as evidence of infection with group A streptococci. Also for immunological and epidemiological studies.

B · B · L offers a complete line of standardized and interstandardized titration reagents combining maximum stability and accuracy of results... with a new ease of performance.

STREPTOLYSIN O REAGENT... Desiccated antigen—instantly restored with distilled water.

STREPTOLYSIN O BUFFER... For diluting sera and red cells.

ANTISTREPTOLYSIN O CONTROL SERUM... A standardized control to confirm accuracy of test.

WASHED POOLED RABBIT CELLS... Ready to dilute for use as indicator of the antigen-antibody reaction.

Literature on techniques and reagents sent on request—write for folder 55-270. (16)
